

About us

Nonprofit organization **CeMaS** - *Center of Magnetic Light* is established to develop knowledge and clean technologies using preferably plasmatic magnetic fields, nanotechnology and other based on harmonic cooperation with nature, from which we learn admirably, and support of true humanity.

Research and applications of plasmatic magnetic fields and their interactions create together with nanotechnologies new oportunities for advances in energetics, trabsportation, agriculture, health care, new materials, environment cleaning and overaly in support of healthier life and humanity.

It includes preparation of developing device prototypes, their testing and progress of measuring and controlling systems.

The company will share the knowledge in a form accessible to public, like lectures etc.

We evolve our [visions and plans](#) step by step in various [projects](#) you can join in as well.

From history

We have met ourselves in year 2013 as people from Czechia, Moravia and Slovakia interested in technologies of [Keshe Foundation](#) organization and we wanted to establish its Czech and Slovak subsidiary. In the beginning of 2014 [Marek Ištváněk attended Spaceship Institute](#), where he could know more about this organization. After longer negotiations with Mr. Keshe we have come to the conclusion that we do not have certain guaranties for proper functioning of the Keshe Foundation subsidiary so we have finally decided not to establish it.

Anyway, we still support clean technologies and knowledge so at the end of 2014 we have decided to establish our own company open to similarly tuned people and we call it CeMaS.
