

Cooperation and Donation

If You like our way, You can also help us in various ways, according to Your possibilities, so that we can achieve more good together.

Have a look at [projects](#) and You can join us.

Good thoughts and feelings will help where focused well and there is an open reciever. Words and deeds as well.

Experiences and Skills

If You have an experience, You could use it to advice well sometimes. We do not know all and so many things can be enhanced just with Your skills. Let us pinpoint few possibilities, where You could help:

- Device prototyping
- Physical process simulation (plasma and fluid dynamics)
- Alternative electronics circuits and devices such a Tesla coils etc.
- Monitoring and control systems (microcontrollers, laboratory hardware and software)
- Experiments and ideas (plasma and magnetic, scalar or otherwise named natural fields, flow of fluids)
- ...

Equipment

If you have any equipment which could help us or facilitate our work, you can lend it to us or donate. These equipment could be useful for us:

- Digital oscilloscope with fast PC connection
- 3D printer or simple CNC/laser for material machining
- Microcontrollers, sensors, etc.
- Power supplies: High and Low voltage
- Cameras: highspeed, infrared, etc.
- Microscope

Each project has different needs which are continously changing and evolving, hence we will be specifying it at [each project](#) during our further development.

Finances

Financing of devices, equipment and our work is matter of continous development as well as our general activity. Our priority is, in this respect, maintaining independence and guarantee availability of developed technologies and cognition to public for the commonweal.

You can donate small or greater amount to:

- [virtuální sbírky](#)
- our transparent account
 - see [Contact](#)
- or donating through [PayPal](#)

If you would like to invest more amounts, we are open to discussion and finding a way to be satisfied on both sides. You can choose a field of our project you are the most interested in and [contact us](#).

Thank you.
