Practical Use

We would like to invent a new kind of technological device which would be enviromental friendly and allow us new, not yet known, applications.

Plasmatic reactors are providing, by its stability, versatile systems for gathering of electrical energy, heat, radiation that promotes human health and other possibilities of positive effects.

New materials provides a possibility to support growth of plant in agriculture or can be part of radiation decontamination process in soil or water.

There are also other applications which may appear to be useful during our research.

Určitě chceme zachovat co největší jednoduchost zařízení a dostupnost lidem, aby se postupně mohly tyto čisté technologie rozšířit na Zemi a pomáhat v každodenním životě, aby byly vytvořeny lepší podmínky i k morálnímu rozvoji lidstva.
